RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 34 pages. Original publisher: Fort Collins, CO : U. S. Dept. of Agriculture, Forest Service, Rocky Mountain Research Station, 2008 OCLC Number: (OCoLC)314432496 Subject: Quercus gambelii -- Southwestern States. Excerpt: . . . Figure 9 - Responses of Gambel oak diameter growth to mechanically thinning ponderosa pine, thinning oak within clumps, and prescribed burning measured retrospectively in northern Arizona ponderosa pine forests by Onkonburi ( 1999 ). Ranges reflect site means, except for the oak thinning treatment that included only one site. Years indicate how long growth changes persisted after treatment. Values are the total change in diameter growth during the time period. In summary, pine thinning likely produces the largest amount of pine basal area removed, but these relation and most persistent enhancement of oak diameter growth ships have not been quantified. Variable and sometimes compared to oak thinning or prescribed burning ( Biondi reduced oak growth after prescribed burning found by and others 1992, Ful and others 2005, Onkonburi 1999 ). Onkonburi ( 1999 ) and Ful and others ( 2005 ) could result Nitrogen fertilization often increases ponderosa pine from damage sustained during burns, energy allocation growth ( Youngberg 1975 ), but has not been tested with to resprouting rather than to growth of residual stems, Gambel oak and it remains unclear if any gains would be or other factors. worth the expenditure. More clearly articulating effects Mechanically thinning oaks from below within oak of pine and oak thinning, prescribed burning, and other clumps produced a slight increase in growth of large treatments ( for example, fertilization ) on oak diameter residual oaks ( 4 inches 10 cm in diameter ), but growth is a key research need. Onkonburi ( 1999 ) cautioned that findings were based on only...
