

## Strategic Risk Management - A new Framework based on the Airbus A-380 crisis

Filesize: 9.59 MB

### ***Reviews***

*It is fantastic and great. It is written in easy words and phrases instead of confusing. I am just delighted to explain how this is actually the best book I have got read through during my individual life and might be the finest publication for ever.*

Grin Verlag Nov 2012, 2012. Taschenbuch. Book Condition: Neu. 211x146x7 mm. This item is printed on demand - Print on Demand Titel. - Scholarly Research Paper from the year 2011 in the subject Business economics - Business Management, Corporate Governance, printed single-sided, grade: 1,0, Copenhagen Business School (Institute of Finance), course: Strategic Risk Management, language: English, comment: Es wird ein neues Framework zur Risikoerfassung entwickelt. , abstract: The paper will outline major flaws in Airbus s risk management and thereby identify reasons for the production delay of the Airbus 380. The Airbus A-380 project was launched in 2000 and remains the largest project in the company s history. The Airplane was designed to carry up to 853 passengers and offer 50 per cent more floor surface than any other passenger aircraft. The total cost of development summed up to 12 billion and it was planned to deliver the first aircraft to Singapore Airlines in 2005. In reality the first aircraft was delivered in 2007. The 2 years delay of the delivery of the first Airbus 380 eventually added up to an estimated sum of 4.8 billion loss in profit. The reason for this delay was that the pre-assembled wirings produced in Germany failed to fit into the frame when the plane was to assemble in France. This misfit can be attributed to the fact that the German plant used CATIA 4 (CATIA is a computer-aided design software) which was only able to show the plane as a two dimensional model while France used CATIA 5 which displayed the plane in three dimensions. 56 pp. Englisch.
