NATURE, ENVIRONMENT AND SOCIETY: CONSERVATION, GOVERNANCE AND TRANSFORMATION IN INDIA

Orient BlackSwan, New Delhi, India, 2012. Hardcover. Book Condition: New. Dust Jacket Condition: New. The future of humanity lies uncertain as nature falls prey to the loot and plunder initiated in the name of development, growth and progress today. As the vast riches of the earth continue to be endangered, a global consciousness regarding the importance of natural resources, biodiversity, etc. is on the rise. Given such a scenario, what is required is further understanding of mans interaction with the environment. This contributory volume examines the interrelationship between nature and society in South Asia. It focuses on four points: perception of natural resources during colonial rule, conservation of nature, role of governments in administering environment, and transformation of nature as a result of development or industrial projects. The book divided into three broad themes, analyses the major decisions taken in India with regard to environment after Independence and their consequences; the relationship between communities which consider natural environment as an essential part of their identity, and as a key factor for social, political and economical issues; and the urban explosion and/or the construction of infrastructure such as dams or roads that have impacted the relationship between different social groups and their territory. It also examines the set-up (policy and stakes), process and consequences (often the displacement of populations) of such projects in three different states of India. Printed Pages: 260.
