*Great electronic book and useful one. It can be written in straightforward terms rather than difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

Not illustrated. 1893 Excerpt: .and less thrifty trees have invariably been removed, so that but little wood and practically no posts have been secured. At this writing, the walnut plantation of 1872 contains 322 trees, 190 of which are of sufficient size to out posts or poles. The best trees are 35 feet in height, with a diameter at the base of 8 inches, and, at five feet, 6 inches. The trees average slightly more than 20 feet in height and 5 inches in diameter at the base; at five feet, 4f inches. A planting made in 1875 upon the same kind of soil has given results very similar to the 1872 planting. This planting contains 735 trees, 582 of which will cut posts or poles. The best trees are 34 feet in height, 7J inches in diameter at the base, 6J inches at five feet. Where well thinned they are growing well, but where standing but four feet each way are dying or making very poor growth. On the College campus, in good soil, the Black walnut has made very satisfactory growths. It is at best a slow-growing tree, but is perfectly hardy, of good appearance, and in every way worthy of planting. The trees have usually begun to bear light crops of nuts when from ten to fifteen years old. Numerous observations have been made in regard to the growth of walnut trees. Prom an article based on these notes, published in the Industrialist, vol. 29, page 234,...
