## MATHEMATICAL QUESTIONS AND SOLUTIONS IN CONTINUATION OF THE MATHEMATICAL COLUMNS OF THE EDUCATIONAL TIMES VOLUME 33

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 32 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1880 Excerpt: . . . without calculation; for the chance that the mixture contains not less than  $i$  ( $m$   $n$ ) wine must be equal to the chance that it contains not more than  $i$  ( $m$   $n$ ) wine, that is, J. 5167. (By Prof. Seitz, M. A. )--A point is taken at random in the surface of a given circle, and from it a line equal in length to the radius is drawn, so as to lie wholly in the surface of the circle; find the chance that the line intersects a given diameter. Solution by Rev. H. J. Day, M. A. ; E. B. Elliott, M. A. ; and others. Let  $p$  be the distance of the random point  $P$  from the centre of the circle  $C$ ;  $c$  the radius of the circle; and  $\theta$  the inclination of  $CP$  to the given diameter. Then the whole range of the angles at which the radius can be drawn as prescribed through  $p$ , is  $2\cos^{-1}\frac{p}{c}$ , and the number that cut the diameter in that set is, evidently,  $\frac{2c}{p}$ . This expression does not seem to admit of integration in finite terms. 5758. (By Rev. H. Q. Day, M. A. )--If  $A, B$  be two fixed points, and  $P$  a variable point in the line  $AB$ , and if with  $A, P$  as foci an ellipse of eccentricity  $e_1$  be drawn, and with  $B, P$  as foci an ellipse of eccentricity  $e_2$ , intersecting the former in  $Q$ ; prove that the locus of  $Q$  is an ellipse...
