

Water-Supply Paper Volume 371-373 (Paperback)

By Geological Survey

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1915 edition. Excerpt: . crossing of the Copper River Northwestern Railway (see Pl. V, B), and Childs Glacier is just below on the opposite side. Large quantities of ice break from the face of these glaciers into the river during warm weather. Childs Glacier appears the more active of the two. Each presents a face of about 2 miles along the river s edge, in some places rising vertically more than 300 feet above the water s surface. Before the construction of the Copper River Northwestern Railway from Cordova to Chitina and Kennicott small boats were used quite extensively on the Copper and some of its larger tributaries, and light-draft steamboats have navigated from the Tasnuna to Copper Center and from Chitina to the Nizina River on the Chitina. Since the railroad has been in operation little boating has been done on the Copper, and the construction...
